From: Catherine Hanna, EIT
To: Potential Bidders
Subject: Addendum #2, Nyack Marina Dredging RFP

The following RFP addendum is provided in response to questions received from bidders. All requirements of the original RFP shall remain in full force and effect, except as set forth in this Addendum and any other previously issued Addenda. Please acknowledge receipt of this addendum by providing a signed copy of this page with your proposal.

Question/Statement #1:

Are the main docks and fingers going to be removed by the Village prior to the dredging or is the contractor responsible for the removal of the docks?

Answer: Per drawing C-00, GENERAL REQUIREMENTS, note 8, "the contractor shall coordinate all work with the owner's field representative to prevent or minimize any interruption to facility operations." Upon being awarded the contract, the contractor shall establish a plan for moving boats and docks during dredging operations with the Village and their dockmaster. The contractor would be responsible for dock removal and reinstallation. Boats will be moved by the Village or individual boat owners. Boats and docks shall be removed one row at a time.
